HLK-33600 4" Cutter:

The HLK-33600 4" Cutter is a self-contained grab, feed and cut unit, which for a weight of only 12Kg can cut pipe, cable or grout hose. This is a significant weight reduction on standard anvil cutters. It can be controlled using standard Hydro-Lek systems or directly from a work class ROV. Constructed principally from 316 stainless steel, the grab grips around the item to be cut, then with the cutter disc rotating, it feeds on to the work piece at a controlled rate to make the cut.
